

I am a member of a large and growing group of people , demanding appropriate justice for the murder of Michael Jackson. We want an immediate review of the involuntary manslaughter charges against Dr. Conrad Murray.

Based on the facts, that are present in the case of The People vs. Conrad Murray, We are convinced that Dr. Murray is responsible for the death of Michael Jackson and has displayed a careless and intentional disregard for his life.

We are demanding that Michael Jackson be treated with the same rights afforded to every other American citizen.

In just this month, Los Angeles District Attorney Steve Cooley set the bail of a Medical Marijuana Operator for \$520,000 . Dr. Conrad Murray's bail was only set for \$75,000.

It is evident that the dispensing of justice is not being applied in Los Angeles. When the crimes of marijuana distributor are judged more harshly than the alleged crimes of well-known cardiologist charged with just "involuntary manslaughter?" It is apparent , that justice has not prevailed.

We are firm in our belief that the charges are not sufficient in this case and we are demanding an increase of the charges, that are appropriate with the facts, that are present.

THE FACTS:

Dr. Murray administered Propofol in a residential home setting without the aid of appropriate medical equipment to monitor his patient, Michael Jackson.

Dr. Murray, a cardiologist, knowingly performed CPR on a bed, contrary to medical guidelines on how to perform effective CPR.

Dr. Murray , left the room from unspecified amount of time , after injecting dangerous levels of Propofol into Mr. Jackson. Given , Dr. Murray's credentials, we find it hard to accept, he was unaware of the potential dangerous.

Dr. Murray did not use sound judgment and wasted precious time in calling for 9-1-1 assistance.

Dr. Murray did not tell the truth - regarding the amount of Propofol he administered to Michael Jackson and those amounts are not supported by the autopsy findings of Michael Jackson.

Deliberate inconsistencies in the timeline provided by Dr.Murray.

We would like an investigation of the allegations, that Dr.Murray left the premises of Carolwood Drive for several hours, after he administered the Propofol to Michael Jackson.

Clearly, this is a premeditated abandonment of his hippocratic oath as a doctor. In addition, Dr.Murray's deliberate actions, warrant a charge of Murder 2.

Given the gravity of the situation and the fact, Mr. Jackson's life was taken. Frankly, the charge of "Involuntary manslaughter " is a slap on the wrist.

We are a base of constituents, representing millions of interested people, who are dedicated to this case and its outcome.

We look to you, to represent , best interest of the people of California, Michael Jackson's family and most importantly, his three children. Thank you for your attention of this request. We look forward to immediate action.
